DOCTOR . . . now YOU can buy OSMOSE TREATED FENCE POSTS . . . at our CARLOAD PRICE

OSMOSE TREATED FENCE POSTS
— Last 3 to 5 times longer — Resist termites!

Doctors were among the first to appreciate the tremendous savings in time, labor and materials that were made possible by the use of Osmose Treated Fence Posts. Doctors everywhere have also been big boosters for these tougher, longer lasting posts! Because of this, we are making this offer in State Medical Journals throughout the South.

As you may know, Osmose Treated Fence Posts are scientifically treated to make the cellulose fibers in the wood unpalatable to the tiny micro-organisms that normally feed on them. With their food supply cut off, these fungi either die or look elsewhere for sustenance.

Osmose Treated Fence Posts last up to five times longer, resist the attack of all wood destroying insects and are fire retardant.

If you have a fairly large place, you can easily use 2000 fence posts, which is approximately the number of posts contained in a standard car. If not, perhaps one of your neighbors would welcome the opportunity to share the surplus. Write us today for complete prices and data.
